1. TEFUGEN's Odoo ERP Solution approach

Overview of Odoo

Odoo ERP software is one of the leading Open source ERP software available in the market, Odoo is a comprehensive suite of business applications that includes various modules such as CRM, Sales, Manufacturing, Project Management, Purchase, Human Resource Management and the list goes on based on company requirements and verticals of industries that users are into. Odoo ERP installation, Configuration, Development, implementation, version upgradation and data migration allows to choose from over thousands of modules available on the shop. Odoo is also available with the option of Cloud or SaaS model to suit small to mid-sized companies.

How TEFUGEN helps to enrich business processes and productivity of organization applying Odoo ERP Software?

TEFUGEN ODOO ERP Techno & Functional Consultants will do a detail business requirement analysis and will come up with multiple solutions which will facilitate more efficient flow of information between all ODOO ERP business functionalities. Our proven methodologies helps our clients with flawless Odoo ERP implementation services.

2. We offer our Clients with the following services related to Odoo:

2.1 Odoo ERP development Services -

- Our offshore (Tiruchirappalli, Tamilnadu, India) ODOO ERP Techno-Functional Consultants at TEFUGEN have completed many Odoo ERP development, Implementation and Data migration. We have a team of Odoo ERP Techno-Functional Consultants and developers with more hands-on Odoo ERP Experience in handling various types of Industry modules from small to big organization. Every Odoo ERP development, implementation, data migration, enhancements, integration, configuration, customization, upgradation at TEFUGEN is carried out with the best Software development methodologies like Agile, Waterfall with Scrum approach and provided automated ticketing system (ACTRA) to ensure success of every Odoo ERP projects we undertake.

2.2 Odoo ERP Customization -

- Odoo ERP consists of variety of modules that can be used on default as vanilla implementation. Since Odoo being Open Source – Odoo can be customized as per the business requirements like E-mail template customization, MIS Reports, Score Card Dashboard Design & Reports and various other business processes. We at TEFUGEN provide Odoo ERP customization services completely, by understanding the basic business flow of our clients before initiating any customization in Odoo software. We also offer new module development in Odoo to satisfy the needs of clients which cannot be implemented from the existing modules customization. We apply effective Project Development Execution approach method like Agile with Scrum approach and the Pricing models as Fixed Price, Time and Material method.

2.3 Odoo ERP 3rd Party Integration -

- Odoo 3rd Party software Integration helps in integrating other applications with Odoo software. As Odoo being a web based ERP software, it allows to integrate all 3rd party applications easily through available API keys or through web services. We have integrated many 3rd party softwares like:
- Integration of Shopify with Odoo ERP, Integration of Magento with Odoo ERP, Integration of any CRM applications API with Odoo ERP, Integration of Amazon.com with Odoo ERP, Integration of eBay with Odoo ERP, Integration of Shipping carriers such as USPS, FedEx with Odoo ERP, Integration of QuickBooks and Integration of Odoo ERP with android mobile applications and much more.

2.4 Odoo ERP Support -

- TEFUGEN team offers both Onsite and Offsite (Location: Tiruchirappalli, Trichy, Tamilnadu, India) Odoo ERP support which can be an ongoing process in Odoo implementation. Our Odoo ERP support is based on Annual Maintenance Contract (AMC) as Quarterly, Half Yearly and Yearly depending upon the requirements. We provide a complete support of Odoo software to ensure the software is working without any bugs or issues. We also ensure that our client's queries are resolved on time based on Odoo ERP Service level agreement (SLA) duly signed by both the parties. As we have already mentioned above we apply effective Project Development Execution approach method like Agile with Scrum approach and the Pricing models as Fixed Price, Time and Material method.

2.5 Odoo ERP Consultation -

- Odoo Consultation is another service we provide. We offer Odoo Consultation on Odoo ERP Modules development, implementation, data migration, enhancements, integration,

configuration, customization, Industry wise and so on. Our Odoo ERP techno-functional consultants have many years of experience in Manufacturing, Trading, Retail, Pharmaceutical, Healthcare and various other ERP services both Onsite and offsite. Our ODOO ERP Consultants can streamline the following process more accurately : Quotation - Sales Order – Purchase order – customization of E-mail template setup from Purchase order to Supplier - Sales Invoice – customization of E-mail template setup from Sales Invoice to Customer - Delivery Order - Accounts Journal vouchers – Sub Ledger - General ledger - Trial balance -Balance sheet –Profit and Loss.

2.6 Odoo ERP version Migration -

- Every year Odoo upgrades new version with more strong features and modules to satisfy various business needs. Our team has successfully migrated version Open ERP 7 to Odoo 11 Upgradation and Open ERP 7 to the latest version for our customers.

3. How does Odoo ERP software benefit companies today :

3.1 Comprehensive

Odoo ERP software is specifically crafted for Big, Small, Medium and Micro Sized Enterprises with modules available for specific industries like Trading, Manufacturing, Retail, Pharmaceutical, Healthcare and Service industry. One of the most important benefits of using Odoo is that it is simply a web based tool where people from anywhere can update details. Some of the other features which an organization can use to generate are Management Information System (MIS) Reports, organization level score card report, Inventory Management & tracking, Point of sales (POS), Integration with eCommerce or any specific modules as per the company requirements.

3.2 Modular

Odoo is very modular in nature for specific industries, there are modules available which can be used as standard modules. Some examples of modules are Hospital management, Loan Management, Insurance Management, Advance Manufacturing, and so on. These specific industry modules further helps to integrate with the standard modules such as Sales, CRM, Purchase, Inventory, Accounting and so on.

3.3 Customisable

In case the Odoo app or Module which any industry or vertical looking out for is not available, Odoo ERP is fully customizable and flexible to be tailored and it fits the specific business needs like creating attractive Score Card Dashboard Design , creating Email Template, generating Sales Invoice Report, and connects easily with Android Mobile Applications.

3.4 Versions

There are different options available such as Odoo Enterprise Version, Community Edition, SAAS Based model to satisfy any organizational needs and requirements based on size.

3.5 Powerful Community

Any ERP software or any Solution capabilities are judged by its community and members who are working round the clock to enhance and develop new features,. Odoo backbone is a community and its partners who contribute to different areas and invention of new modules everyday, which satisfy the needs of organizations across the globe.

3.6 Cost Effective

The base community edition of Odoo consists of various features and apps that can be used for standard operations. further Odoo community edition bears no licensing fee on per-user basis which makes Odoo a cost effective Solution.

3.7 No Vendor Lock In

Unlike other proprietary software with Odoo there is no vendor lock-in option. The Vendor could be changed whenever required if incase company is not comfortable with existing Odoo vendor. Further there are more than 500+ Odoo partners around the world to choose from. TEFUGEN has been working on Odoo since the release of version 5 in the year 2009. Our team has worked on various Odoo versions: 5, 6, 6.1, 7, 8, 9, 10 & 11. We work with companies ensuring end to end service related to Odoo ERP software.

4. Implementing Odoo ERP solution has the following benefits:
